DETAILED ACTION

Response to Amendment

1. The amendment filed 18 August 2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the encrypted information signal enables a receiver device to be automatically self-synchronized. The specification discloses that ability of the receiver device to be self-synchronized, but is silent with respect to this process being automatic.

Applicant is required to cancel the new matter in the reply to this Office Action.

Response to Arguments

2. Applicant's arguments, filed 18 August 2005, with respect to claims 1-10 have been fully considered and are persuasive. The previous claim rejections have been withdrawn.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The added material which is not supported by the original disclosure is as follows: the encrypted

information signal enables a receiver device to be automatically self-synchronized. The specification discloses that ability of the receiver device to be self-synchronized, but is silent with respect to this process being automatic.

Allowable Subject Matter

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose a method of generating an encrypted chaotic signal that is used for synchronizing a sender and receiver device by filtering the signal, in the feedback loop, to limit the spectrum of the chaotic signal to one or more spectrum bands.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
